

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-31 (canceled)

Claim 32 (previously presented): A brush, in particular a toilet brush, comprising a disposable one-way brush head, a brush head holder with a handle, the brush head being detachably mounted to the brush head holder under friction closure, and an ejection mechanism for the brush head, the ejection mechanism comprising a sleeve-shaped ejection member movable along the brush head holder, an actuator element movably arranged on the handle, and a motion transfer element between the actuator element and the sleeve-shaped ejection member, wherein the motion transfer element extends in the interior of the handle.

Claim 33 (previously presented): The brush according to claim 32, wherein the brush head holder comprises oblong slots and the motion transfer element comprises a connection element movable in the brush head holder, the sleeve-shaped ejection member being connected to the connection element via a bolt sliding in the slots.

Claim 34 (previously presented): The brush according to claim 32, wherein the motion transfer element is an extension of the actuator element.

Claim 35 (previously presented): The brush according to claim 32, wherein the motion transfer element is a rod-shaped element.

Claim 36 (previously presented): The brush according to claim 32, wherein the handle features a bend and the motion transfer element is flexible.

Claim 37 (previously presented): The brush according to claim 36, wherein the motion transfer element is a wire.

Claim 38 (previously presented): The brush according to claim 32, wherein the brush head comprises bristles made of a degradable material.

Claim 39 (previously presented): The brush according to claim 38, wherein the bristles are made of paper.

Claim 40 (previously presented): The brush according to claim 38, wherein the bristles are arranged in a receiving sleeve made of degradable material.

Claim 41 (previously presented): The brush according to claim 40, wherein the receiving sleeve is made of paper.

Claim 42 (previously presented): The brush according to claim 40, wherein the brush head holder has a cylindrical end section, and wherein the receiving sleeve is designed as a hollow cylinder stuck onto the cylindrical end section.

Claim 43 (previously presented): The brush according to claim 38, wherein a protective sleeve surrounding the bristles is provided.

Claim 44 (previously presented): The brush according to claim 32, wherein the brush head is made of water-soluble plastic.

Claim 45 (previously presented): The brush according to claim 32, wherein the brush head is impregnated with at least one agent.

Claim 46 (previously presented): The brush according to claim 45, wherein the agent is selected from the group consisting of a cleaning agent, a disinfecting agent and a scent agent.

Claim 47 (currently amended): A brush, in particular a toilet brush, comprising a disposable brush head made of a degradable material, a brush head holder with a handle featuring a bend, the brush head being detachably mounted to the brush head holder under friction closure, and an ejection mechanism for the brush head, ~~wherein~~ the ejection mechanism ~~comprises~~ comprising a sleeve-shaped ejection member movable by means of an actuator element, wherein the brush head comprises bristles arranged in a receiving sleeve, the receiving sleeve being mountable to the brush head holder.

Claim 48 (previously presented): The brush according to claim 47, wherein the bend is near the brush head.

Claim 49 (previously presented): The brush according to claim 47, wherein the bend comprises an angle of approximately 155°.

Claim 50 (canceled)

Claim 51 (canceled)

Claim 52 (previously presented): The brush according to claim 47, wherein the actuator element is connected with the ejection mechanism via a wire.

Claim 53 (canceled)

Claim 54 (previously presented): The brush according to claim ~~53~~ 47, wherein the brush head is made of paper.

Claim 55 (canceled)

Claim 56 (currently amended): The brush according to claim ~~53~~ 47, wherein the brush head is made of water-soluble plastic.

Claim 57 (currently amended): The brush according to claim ~~53~~ 47, wherein the brush head is impregnated with at least one agent.

Claim 58 (presently presented): The brush according to claim 57, wherein the agent is selected from the group consisting of a cleaning agent, a disinfecting agent and a scent agent.

Claim 59 (previously presented): A brush, in particular a toilet brush, comprising a brush head, a brush head holder with a handle, the brush head being detachably mounted to the brush head holder under friction closure, and an ejection mechanism for the brush head, the handle being composed of several parts cemented together, wherein said several parts comprise a grip part, a cone part, a connection tube, a connection part, the connection part being connected with the brush head holder, an actuator element movably arranged on the grip part, and a motion transfer element between the actuator element and the ejection mechanism, the motion transfer element being slidably arranged in the connection tube.

Claim 60 (canceled)

Claim 61 (previously presented): The brush according to claim 59, wherein the parts of the handle are made of plastic material.

Claim 62 (previously presented): The brush according to claim 59, wherein the parts of the handle are made of stainless steel.

Claim 63 (previously presented): The brush according to claim 59, wherein the connection tube comprises a bend.

Claim 64 (previously presented): The brush according to claim 59, wherein the brush head is a disposable brush head made of a degradable material.

Claim 65 (previously presented): The brush according to claim 64, wherein the brush head is made of paper.

Claim 66 (previously presented): The brush according to claim 64, wherein the brush head comprises bristles arranged in a receiving sleeve, the receiving sleeve being mountable to the brush head holder.

Claim 67 (previously presented): The brush according to claim 59, wherein the brush head is made of water-soluble plastic.

Claim 68 (previously presented): The brush according to claim 59, wherein the brush head is impregnated with at least one agent.

Claim 69 (previously presented): The brush according to claim 68, wherein the agent is selected from the group consisting of a cleaning agent, a disinfecting agent and a scent agent.

Claim 70 (previously presented): A disposable brush head for a toilet brush with a brush head holder, the brush head being detachably mountable to the brush head holder under friction closure, the brush head comprising bristles arranged in a receiving sleeve, the receiving sleeve being mountable to the brush head holder, wherein the bristles and the receiving sleeve are made of degradable material.

Claim 71 (canceled)

Claim 72 (previously presented): The brush head according to claim 70, wherein the bristles are made of paper.

Claim 73 (canceled)

Claim 74 (previously presented): The brush head according to claim 70, wherein the receiving sleeve is made of paper.

Claim 75 (previously presented): The brush head according to claim 70, wherein the receiving sleeve is designed as a hollow cylinder mountable to a cylindrical end section of the brush head holder.

Claim 76 (previously presented): The brush head according to claim 70, wherein a protective sleeve surrounding the bristles is provided.

Claim 77 (previously presented): The brush head according to claim 70, wherein the brush head is made of water-soluble plastic.

Claim 78 (previously presented): The brush head according to claim 70, wherein the brush head is impregnated with at least one agent.

Claim 79 (previously presented): The brush head according to claim 78, wherein the agent is selected from the group consisting of a cleaning agent, a disinfecting agent and a scent agent.

Claim 80 (previously presented): A brush, in particular a toilet brush, comprising a disposable brush head made of a degradable material and a brush head holder with a handle featuring a bend, the brush head being detachably mounted on the brush head holder, wherein the brush head comprises bristles arranged in a receiving sleeve, the receiving sleeve being mountable to the brush head holder.

Claim 81 (previously presented): A brush, in particular a toilet brush, comprising a brush head made of a degradable material and a brush head holder with a handle, the brush head detachably mounted on the brush head holder comprising an ejection mechanism, the handle being composed of several parts cemented together, wherein the brush head comprises bristles arranged in a receiving sleeve, the receiving sleeve being mountable to the brush head holder.

Claim 82 (previously presented): A disposable brush head for a toilet brush with a brush head holder, the brush head being detachably mountable to the brush head holder under friction closure, the brush head comprising bristles arranged in a receiving sleeve, the receiving sleeve being mountable to the brush head holder, wherein a protective sleeve surrounding the bristles is provided.

Claim 83 (previously presented): A disposable brush head for a toilet brush with a brush head holder, the brush head being detachably mountable to the brush head holder under friction closure, the brush head comprising bristles arranged in a receiving sleeve, the receiving sleeve being mountable to the brush head holder, wherein the brush head is made of water-soluble plastic.
